Education:

California State Los Angeles, Computer Science — *BS*

Sept 2013 - Jun 2019

In Senior Design class, I am working in a Java project simulating different network topologies. I am in charge of the front end design and disturbing each task to each member of the group. We use JavaFx in order to make the user interface.

Work Experience:

Tire Technician, Fregoso's Tires
March 2012 - PRESENT
My role is to change, balance, repair, install and sell tires.

Usher, AMC
Jun 2013 - Nov 2015
I would sell tickets, membership cards, and concession item. I would occasionally manage the floor as where I would clean theaters and prep food.
I was awarded Employee of the month of February 2014.

Projects:

Grocery App— *android app*

This is my personal android app project. It will group families or friends so the group can communicate, and organize a list of items. User can keep track of what item has been checked by the user.

Fitness App— *android app*

This android app will keep track of user activities and will trace a route based on user location. In addition user will impute the food user consume and the app will convert the food consumption to calories and keep track day to day eating habits. I worked with three other people where I was in charge of the user route trace.

Skills:

Programing languages
        Java(strong), Javascript/html, Python

Languages
        I speak both English and Spanish.

Interest
        Web development, and phone application both android and apple
